February 9, 2022

▶ Quiz 4 is Monday, 2/14. Sample Quiz 4 is on the course website. We will review the sample quiz this Friday, but this review will be **student-led**, so be ready!

▶ Lab 4 is due Monday, 2/14.

▶ Programming Assignment 3 is on the course website and is due Wednesday, 2/16.

▶ Lab 3 and Quiz 3 are graded on D2L.

▶ Remember that the optional final project can replace your lowest quiz or programming assignment (or, if desired, lab) score. Details will be on the course website by Monday, 2/14.

▶ Remember that final date to withdraw from CSC 108 (and any other current 8-week class) is **Friday, 2/18.**

Example 8-5

- Go to Lab 4 and scroll down to example 8-5. This code is the basis for the changes made in #10 and #11, but before moving on, copy and paste the code into Processing and observe what happens.

- Assemble into groups of 2 or 3. Discuss the code and explain why it is working the way it is working.

- Once your group has explained why this code works to my satisfaction, you will work on #10 and #11 together.
